EMPOWERING FUTURE CAREERS:
ed2go's IT and Cybersecurity Pathways

CAREER PROGRESSION FOR COMPTIA PROFESSIONALS

Our IT and cybersecurity courses provide students with the skills needed for successful career progression from entry-level roles to specialized industry positions.

Key CompTIA certifications we offer include:

CompTIA TECH+	Prepare students for roles in IT support, channel account management, technical sales, and more
CompTIA A+	Provide a solid foundation for entry-level positions such as help desk technician, IT specialist, and field service technician
CompTIA Network+	Develop skills in network security operations, network security analysis, and data architecture
CompTIA Security+	Prepare students for a cybersecurity career, including roles like junior cybersecurity analyst and security administrator
Cisco Certified Network Associate (CCNA), Cisco Certified Network Professional (CCNP), CompTIA Linux+, Certified AWS Solutions Architect	Prepare students to grow their careers to become network administrators, network engineers, network architects, and more
Certified Network Defender (CND), Certified Information Security Manager (CISM), Certified Penetration Testing Professional (CPENT), Certified Ethical Hacker	Prepare students to grow their cybersecurity careers as security managers, systems auditors, ethical hackers, information security analyst and more

"ed2go's innovative online courses completely transformed my learning experience, making complex topics engaging and boosting my confidence as I advanced in my career. Their dynamic support and flexible platform truly redefined professional growth for me."
