

STUDENT SUCCESS STORY

FROM SALES TO SCRIPTS: ONE PROFESSIONAL'S PATH TO BECOME A PHARMACY TECHNICIAN

LEARNING ONLINE. TRAINING CLINICALLY. LANDING THE JOB.

CALIFORNIA STATE UNIVERSITY
SAN BERNARDINO

ed2go

ADAM C. was ready for a career change after 18 years in retail—including six with Apple. Drawn to the pharmacy field, he enrolled in ed2go's **Pharmacy Technician** course through California State University, San Bernardino.

Adam discovered the course while researching pharmacy technician training at his alma mater and valued that the program was offered in partnership with CSUSB. He was motivated by a desire to pursue a more meaningful and stable career. Although Adam was initially hesitant about learning online, especially with topics like pharmacy math, he found the course structure and support system to be incredibly helpful. His instructor and student advisor also provided key guidance throughout the course and externship process.

Adam's clinical experience at CVS Pharmacy was a turning point. He impressed the pharmacy manager with his work ethic and was offered a full-time position. The course not only helped him secure employment but also gave him the confidence and foundational knowledge to thrive in his new role.

Now working as a pharmacy technician, Adam feels more confident in his career and has a deeper understanding of medical terminology—something that has also benefited him in his personal life. He plans to continue his education with ed2go, exploring additional courses to further his professional growth.

“ed2go took away the fear that comes with starting a new career. I never felt alone during the whole process and knew there was someone who would be able to help with any questions or concerns that I had!”

CHALLENGE

Adam initially struggled with learning new concepts in an online format and feared he wouldn't be able to apply the material in real-world settings.

SOLUTION

Online, self-guided ed2go course:

- **Pharmacy Technician (Voucher Included)**

RESULTS

Adam completed the course, passed the **Pharmacy Technician Certification Exam (PTCE)**, and secured a full-time pharmacy technician role at CVS Pharmacy. He now feels confident in his new career and plans to take additional ed2go courses.

\$43,460 MEDIAN ANNUAL WAGE

for Pharmacy Technicians, with opportunities for advancement through certification and experience.
